Saving Water

Saving water is important because if you don't save water, nothing would be able to live. For example, people, animals, and plants would not be able to live. There are lots of ways to save water.

One way to save water is to use a pitcher and fill it up with water and keep it in your refrigerator so it stays cold and you don't have to run water from the sink and waste it when it is getting cold.

Another way to save water is to put a bowl under your vegetables and catch the water so you can use it to water your plants.

Another way to save water is to put a barrel outside to catch the rain water and use it to water your vegetables. Also, another way to save water is to take short showers because if you do it saves water. Also you can save water by taking short showers and no baths because baths waste a lot of water. It's also fun to play in the sprinkler in summer but only do it when the lawn is being watered.

There are lots of ways to save water. If you don't save water then there won't be any water in the future so save water.
