

# Adding up

Fill in the missing numbers, and add.

$$3 + \boxed{3} = \boxed{6}$$
$$4 + 4 = \square$$
$$7 + \square = \square$$
$$6 + \square = \square$$
$$3 + \square = \square$$
$$\square + \square = 15$$

Count on to find out on which step the rabbit stops.

$$4 + 3 = \boxed{7}$$
$$2 + 7 = \square$$
$$8 + 2 = \square$$
$$5 + 5 = \square$$

# Adding up

Fill in the missing numbers, and add.

$$3 + \boxed{3} = \boxed{6}$$
$$4 + 4 = \boxed{8}$$
$$7 + \boxed{1} = \boxed{8}$$
$$6 + \boxed{3} = \boxed{9}$$
$$3 + \boxed{8} = \boxed{11}$$
$$\boxed{5} + \boxed{10} = 15$$

Count on to find out on which step the rabbit stops.

$$4 + 3 = \boxed{7}$$
$$2 + 7 = \boxed{9}$$
$$8 + 2 = \boxed{10}$$
$$5 + 5 = \boxed{10}$$

In the activity on top, the two numbers written must match the numbers of beads shaded and unshaded. In the last example, any one of a number of combinations could be correct. For the second activity, encourage your child to count mentally.
