$$\begin{array}{r} 116,387 \\ - 2,798 \\ \hline \end{array}$$

Write the answer in the box.

$$4,555,562 - 1,624,871 = \boxed{}$$

$$962,118 - 8,467 = \boxed{}$$

Work out the answer to the problem. Use the space for working it out.

2,826 people went to see a rock concert. 135 had to leave early to catch their train.
How many were left at the end?

The most likely errors to occur in the first section will involve subtractions where a larger digit has to be taken away from a smaller digit. Children often take the smaller digit that is on the top away from the larger digit on the bottom.
